

Hi! My name is Ms. Jessie Erdmann. This is the start of my 3rd year at Redeemer. My first year here, I started out as a part time teacher learning the ropes of the preschool aged child. My second year here, Redeemer took a big leap and started our Nature-based Program and asked me to take on full days. I'm happy to say we survived the first year of a big transition, and I'm still excited to see where our adventure will lead us with our Nature-based program. To go back a step or two, I graduated from UW-LaCrosse with an education degree and subbed for a few years before coming to Redeemer. In addition to my teaching job, I also work at Kwik Trip. I currently live in the Nodine area with my parents, but am in the process of building my own house not far from home. If all goes as planned I should be moved in by the new year. I enjoy spending time with my family, especially my nieces and nephews. I love animals, my dog and horses specifically. Oh, I can't forget the ducks, Rainbow and Pecky, from our incubation hatch last spring here at Redeemer. Sadly, they don't love me as much as I would like. There's so much more I could say, but I will leave that for the rest of the year. I look forward to getting to know you, your child, and your family.

-Ms. Erdmann
